**TOTAL PROJECT COST IN WORDS:** \_\_\_\_\_  
\_\_\_\_\_

**CONTRACTOR / BIDDER :** \_\_\_\_\_

Republic of the Philippines  
Southern Luzon State University  
Project Management Office  
Lucban, Quezon

**PROJECT TITLE :** Consolidation Survey of 14.5 Hectares Piis Lot (4 Lots) including 4 point Survey  
Reference Point

**PROJECT LOCATION :** Brgy. Piis, Lucban, Quezon

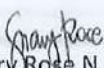

**OWNER :** Southern Luzon State University

**PROJECT DURATION :** 60 CD

**SCOPE OF WORKS**

1. To conduct a preliminary site investigation for existing monuments or controls available found useful to the boundary verification and to conduct technical research to respective government agencies for the registered metes and bounds of the subject property.
2. To establish 4 control points using tertiary project control standards as stated on official gazette/DENR Administrative Order (DAO 2007-12). Angular and linear errors of closures must be in accordance with the specifications and requirements of the Manual for Land Surveys in the Philippines (Land Administrative Order No. 4)
3. Conduct a boundary survey to precisely define the existing lot boundaries, using the established control points as a reference.
4. Confirm the positions of any existing survey markers, physical structures, fences, or other relevant features that may influence the boundary definitions.
5. Calculate and adjust boundary lines based on the integration of multiple parcels into one consolidated lot, ensuring compliance with local land laws and regulations.
6. Process all data collected in the field, ensuring all measurements align with the established control points and coordinate systems. Use industry-standard software (e.g., AutoCAD, GIS, or similar) to generate a survey map showing the boundaries of the consolidated lot, the control points, and any relevant topographic features.
7. Prepare the Consolidation Survey Plan, which will show the newly consolidated lot with the adjusted boundaries and four control points.
8. Provision of the printed, electronic copy (dwg file), & Google Earth overlay of the lot (kmz or kml file) of the final survey plan of the lot verified, signed and sealed by a duly registered professional.
